Contemporary Marxism

3. 1974-1987 -

Crime and Social Justice

4. 1965-1975 -

Issues in Criminology

5. 1976-1979 -

Synthesis

Description:

Social Justice is a quarterly journal that was founded in 1974. It seeks to promote human dignity, equality, peace, and genuine security. Its early focus on crime, police repression, social control, and the penal system has expanded to encompass globalization, human and civil rights, border, citizenship, and immigration issues, environmental victims and health and safety concerns, social policies affecting welfare and education, ethnic and gender relations, and persistent global inequalities. The journal has framed its vision of social justice with an understanding of the international dimensions of power, inequality, and injustice. It presents divergent viewpoints in a readable fashion for concerned citizens with an interest in current affairs, while including ample notes and references to satisfy the academic reader.

Avoidable Cost of Alcohol Abuse in Canada

To estimate avoidable burden and avoidable costs of alcohol abuse in Canada for the year 2002.

A policy effectiveness approach was used. The impact of six effective and cost-effective alcohol policy interventions aimed to reduce alcohol consumption was modeled. In addition, the effect of privatized alcohol sales that would increase alcohol consumption and alcohol-attributable costs was also modeled. The effects of these interventions were compared with the baseline (aggregate) costs obtained from the second Canadian Study of Social Costs Attributable to Substance Abuse.
